

## ENVIRONMENTAL AND ENERGY POLICY

Fiat Chrysler Automobiles S.p.A , in agreement with the principles expressed in the FCA S.p.A documents "Environmental Guidelines" and "Code of Conduct" establishes and applies an Environmental and Energy Management System in accordance with ISO 14001 and ISO 50001 standards.

For this purpose, Top Management establishes its own principles of Environmental and Energy Policy valid for the purpose and scope of the Environmental and Energy Management System that all employees shall know, share and put in practice:

- To protect the environment, to preserve the biodiversity and to fight climate change through an efficient use of energy and natural resources;
- To ensure continual improvement of the Environmental and Energy Management System, by preventing the impacts of its own activities that could generate pollution and ensuring the continual improvement of energy performance;
- To ensure compliance with applicable environmental legislation and with the requirements subscribed by the organization related to its energy use, consumption and efficiency;
- To guarantee training of its own employees, in order to develop a correct environmental and energy awareness;
- To ensure the availability of adequate information as well as specialist and economic resources, to achieve and periodically review objectives and targets;
- To optimize the use of the most important resources raw materials in the production processes;
- To support the process design, and the purchase of products and services for energy performance improvement.
- To rationalize waste management by encouraging source separation by reducing the amount of generated wastes and by supporting waste recovery;
- To promote the reduction in water consumption, by encouraging actions of reuse and recycling;
- To promote supplier awareness, in particular those located within the site, about the adoption of operational standards in line with the principles of our Environmental and Energy Policy.
